H1 Manpower

For each of the H1 UK Institutes, the names of those working on the H1 physics programme and the proportions of their time they dedicate to H1 are given in the following tables. The proportions are given as percentages of a Staff Year in the academic years 2000/2001 to 2003/2004. Some information on the "category" of the people involved is also given.

R. Henderson	100				

If the above situation persists, Lancaster will have no further Ph.D. students on H1 and will withdraw from the Collaboration in January 2001. However, the group will be making new academic appointments in the year 2000 and if they are able to attract a candidate of sufficient quality who would like to work with the H1 Collaboration, the above will be reviewed.
